Salem, Tamilnadu | +91 9698813344 | ragul4172@gmail.com | <https://github.com/ragul023> | www.linkedin.com/in/ragulr23

EXECUTIVE SUMMARY

Computer Science undergraduate and Full-Stack Developer with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, and software engineering. Skilled in Java, JavaScript, React.js, Node.js, Express.js, PostgreSQL, and MongoDB, with hands-on experience designing and developing reliable web applications, RESTful APIs, and backend systems. Developed real-world projects featuring authentication, role-based access control, database design, webhooks, and event-driven workflows, demonstrating strong analytical and troubleshooting skills. Interested in developing scalable, maintainable software and solving complex engineering problems as a Software Development Engineer.

EDUCATION

Alagappa Chettiar Government College of Engineering and Technology (ACGCET), Karaikudi	2024 - 2028
<i>B.E. Computer Science and Engineering</i> CGPA: 7.6/10	

Work Experience

Software Engineer Intern

Tamil Nadu Lateral Entry Admissions

Jun 2026 - Aug 2026

- Executed the complete software development lifecycle for Tamil Nadu Lateral Entry Admissions, optimizing operational efficiency and facilitating the successful processing of 15000 applications.
- Developed and maintained applications using MySQL, Express, React, and Node.js, achieving improved system performance and supporting successful deployments.
- Conducted rigorous testing and server management to enhance system reliability.
- Partnered with cross-functional teams in a startup environment to design and implement enhancements that significantly improved user experience.

Software Engineer Intern

TNLEA Approval Process

Aug 2026 - Present

- Contributed to a MERN-based student approval portal for college staff to verify allotted student details, maintain records, and process management-quota admissions.
- Developed RESTful APIs with Node.js/Express.js, implementing JWT authentication, authorization, validation, and secure API workflows.
- Developed PDFKit-based student and administrative reports and contributed to enhancing the React.js frontend and integrating APIs.
- Worked with MySQL and AWS to maintain the application, debug issues, and implement requirement-driven features.

TECHNICAL SKILLS

Languages: Java, JavaScript, C, SQL, Python

Frontend: React.js, HTML, CSS

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MongoDB, MySQL

Tools: Git, GitHub, Postman, Figma, Vercel, AWS-EC2

PROJECTS

CSE WEBSITE

GitHub | Live

React.js | Node.js | Express.js | PostgreSQL

- Built a role-based attendance management system supporting Student, Representative, Moderator, Faculty, Advisor and Admin workflows.
- Designed a PostgreSQL data model for students, staff, timetables, attendance sessions and attendance records.
- Implemented REST APIs with authentication and role-based access control for secure workflow management.
- Developed timetable-driven attendance flows allowing faculty to manage attendance according to scheduled periods.

GitHub Monitor

GitHub | Live

React.js | Node.js | Express.js | MongoDB | GitHub Webhooks

- Developed a GitHub activity monitoring platform using GitHub OAuth and webhook-based event processing.
- Implemented an event dispatcher architecture for processing push, pull request and issue events.
- Designed MongoDB schemas for users, repositories and GitHub events.

DSA Tracker

React.js | Node.js | Express.js | PostgreSQL

- Built a full-stack DSA progress-tracking platform for organizing coding problems and monitoring preparation progress.
- Designed and implemented RESTful APIs, PostgreSQL database schemas, authentication, and role-based access control.
- Developed problem categorization, progress tracking, and performance analytics features to monitor coding preparation.
- Built a responsive React.js interface using reusable components and integrated frontend-backend workflows for efficient data management and progress visualization.

ACHIEVEMENTS

- Solved 40+ DSA problems across arrays, strings, linked lists, stacks, queues, trees and graphs.
- **Code Knight** – Awarded in symposium for securing overall second place in Intra College Coding Competition.
- Completed Full stack Web Development with Gen Ai course Provided by Skill Vedant.

Open-Source Contributor — Avenx.js

- Contributed to **Avenx.js routing**, implementing route-level redirects with support for **static, dynamic, and asynchronous redirects**, redirect chains, cycle detection, and maximum redirect limits.
- Added support for **replace-style navigation, route parameters, navigation guards, delegates, and browser history**, strengthening routing and navigation behavior.
- Implemented **route metadata propagation** across the matcher, router, and navigation guards, improving metadata availability throughout the navigation lifecycle.
- Authored and submitted GitHub Pull Request #980, which was successfully merged after thorough validation.
